2027 Asian Conference On
Fish Models For Diseases

March 3-6, 2027
Osaka, Japan

# About

## The Asian Conference on Fish Models for Diseases

The 2027 Asian Conference on Fish Models for Diseases will mark the **5th edition of the conference and will be celebrated as a special jubilee edition.** Taking place from March 3-6, 2027 in Osaka, Japan, the conference will present the latest developments in **biomedical, disease-related and aquaculture using a wide variety of fish species as a model.**

The conference brings together leading scientists, early-career researchers, decision-makers, and other professionals from **Asia, Europe, North America, Australia, New Zealand, and beyond.** While rooted in Asia, the conference has a truly international scope, creating a unique meeting place where East and West come together.

Sponsors play an important role in the success of the conference. By contributing their knowledge, expertise, technologies, products, and services, sponsors help strengthen the connection between scientific research and practical innovation. At the same time, the conference offers sponsors a valuable opportunity to engage directly with leading experts and emerging talents in the field, gain visibility within a highly specialised scientific community, and stay closely connected to the latest developments in fish model research.

To encourage meaningful interaction, **sponsors are invited to set up their booths within the conference room itself,** rather than in a separate exhibition area. This ensures that sponsors are fully integrated into the heart of the conference and have direct access to participants throughout the scientific program. The setting facilitates informal exchange, focused discussions, and new opportunities for collaboration between sponsors and conference paricipants.

As the 5th jubilee edition of the conference, Osaka 2027 offers sponsors a unique opportunity to associate their organisation with a well-established international scientific meeting and a growing platform for scientific exchange. We warmly invite companies, organisations, and institutions active in biomedical research, aquaculture, laboratory technologies, imaging, genetics, genomics, screening platforms, pharmaceuticals, toxicology, and related fields to become part of this special edition.

The Conference organized by the Fish Models for Diseases Foundation, a foundation by Dutch law, will be held in Taipei, Taiwan, from January 19 - January 22, 2026.

# Topics

## Trending Topics of The Conference

- Disease models:
  Zebrafish, Medaka and other fish species
- Infectious diseases:
  Tuberculosis, other Bacteria, Viruses, Fungi, Protists
- Developmental and neural diseases
- Diseases linked to immunity:
  Cancer, Diabetes, Microbiome aberrations, Colitis, Regenerative
- General Technologies:
  Genetics and Genomics, Toxicology, Pharmacology and Cell signaling

# Sponsorship Packages

| | **Platinum** €5000 | **Gold** €3500 | **Silver** €2000 |
|---|---|---|---|
| Your logo will be prominently displayed on the event website | ✓ | ✓ | ✓ |
| Exhibition stand in the conference room | ✓ | ✓ | ✓ |
